Dear Sagar Ji,

I hope you are doing well.

Following our discussion last week, I would appreciate the opportunity to meet you face to face at your **Chakan plant**. To help us plan effectively, may I kindly request you to share your **tentative travel dates to CEPA, Sweden**, when you will be available on site.

This information will enable us to coordinate accordingly and arrange a site visit by our executive, ensuring proper alignment on scope and next steps.

To provide some background on our capabilities, AA Infinite Global Services (AAIG) brings extensive global experience in business development, technical rework, quality engineering, and SCM solutions, supported by teams operating across multiple international locations. We have successfully executed critical projects for leading OEMs through Tier-1 suppliers, including:

- **Detroit Diesel Corporation** (Michigan, USA)
- **MAHLE** (Charleston, USA & Mexico)
- **Eaton, Volvo, Danfoss** (USA)
- **DANA** (Mexico)
- **PUREM** (Ramos Arizpe, Mexico)
- **Navistar / International** (USA)
- **MAN Truck & Bus** – EU plants
- **Daimler Truck AG**
- **Dorman Drive** – Wheel Nut Inspection & Rework Project (Warsaw, KY, USA)
- **JLR** – EPMC Solihull (UK) & Nitra Plant (Slovakia)

In addition, AAIG operates a fully functional warehouse and service facility in **Michigan, USA**, currently managing over **1,500 pallets** of inbound, storage, and outbound material. The site is **EDI/ASN-enabled** and supports value-added services such as sorting, repacking, inspection, and technical rework—allowing us to deliver seamless end-to-end execution across North America.

AAIG has also supported multiple value-added technical rework and containment projects across global customer locations, ensuring consistent quality, responsiveness, and compliance with OEM expectations.

Prior to founding AAIG, I served as **Country Head – Magna Exteriors India**, working closely with global OEMs and Tier-1 suppliers. This experience, combined with our current global footprint, continues to strengthen our operational depth and execution capability worldwide.

Please find attached our company profile for your reference. I would be happy to discuss how AAIG can effectively support the Sweden project and explore potential areas for future collaboration.

Looking forward to your response and next steps.

Warm regards,
Anand Abbad
